Improving Suspension Components with the Right Lubricant

A strut is an integral part of a vehicle's suspension, as it supports the vehicle and absorbs impacts from bumps, potholes, and other road disturbances. Lubricating the upper isolator and jounce bumper while also utilizing the correct internal strut/shock oil will help reduce friction, noise, vibration and harshness (NVH) in the suspension.

ARTIST'S CONCEPTION OF THE GOES-R SPACECRAFT CREDITED TO LOCKHEED MARTIN.

NASA, the NOAA, and Nye

For over 60 years we have been involved with leaders in the aerospace industry, designing and testing lubricants for space applications. Our latest partnership was on next generation geostationary weather satellites, called the GOES-R series, a collaborative NASA and NOAA program.

Semicon & In Vacuum - Industry Lubricants

Today's vast array of electromechanical devices in semiconductor wafer fabrication, flat panel, solar panel and LCD manufacturing equipment place increasingly challenging demands on their lubricants. Watch our Semicon Industry video to learn how Nye is servicing this industry with our lubricant testing, application expertise, and NyeTorr® and NyeClean® product lines.

Mini Traction Machine Comes to Nye

Nye's Applied Science and Tribology Lab (ASTL) has continued to expand its capabilities in testing and characterization of tribological applications with the acquisition of a Mini Traction Machine (MTM). The MTM measures frictional properties in a wide variety of rolling/sliding conditions. This is critical to

simulating applications like rolling element bearings and gears.
