

NYECORR[®] 140
FOOD GRADE & PFOA-FREE

*The corrugating industry's most
advanced synthetic grease.*

NYECORR® 140

THE CORRUGATING INDUSTRY'S MOST ADVANCED SYNTHETIC GREASE

Lubricating Single-Facer Bearings

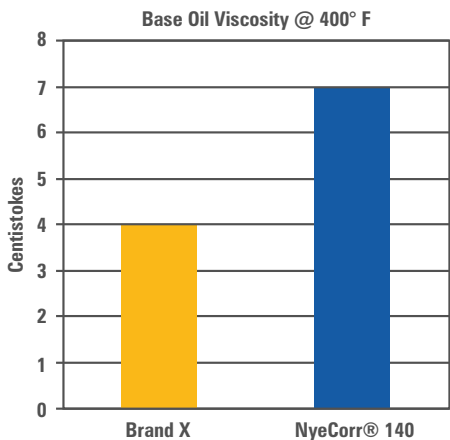

Corrugated packaging is one of the most economical, rugged and environmentally sound ways to ship goods. More than two-thirds of the world's retail commodities, from boxed chocolates to heavy industrial components, are transported in corrugated boxes. The efficient and cost-effective production of corrugated board depends on good lubrication. Without it, the entire corrugating production line would come to a screeching halt.

NyeCorr® 140 synthetic bearing grease is formulated specifically for the maintenance of single-facers in the corrugating industry. Since its introduction, hundreds of corrugating plants worldwide have converted to NyeCorr® 140 and realized significant cost reductions, while increasing performance, improving in-plant safety and extending maintenance cycles compared to non-synthetic lubricants.

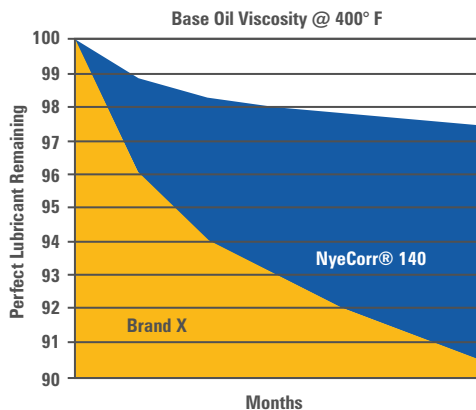

NyeCorr® 140, a PTFE-thickened, heavy viscosity completely fluorinated grease, lubricates the bearings in pre-heater, corrugating and pressure rolls of the single-facer.

CORRUGATING TODAY

Higher Oil Viscosity

- Thicker film of oil for protection
- Less bearing/race contact
- Less vibration and wear

Lower Evaporation

- Eliminates the potential for oil leaks
- Byproducts vaporize, leaving no gummy tars/deposits
- Smaller volumes of grease are needed

When we first introduced NyeCorr® 140 to the corrugating industry, we gave corrugating customers an option they had long been without; a high-viscosity base oil lubricant that would protect their corrugating roll, pressure roll and pre-heater roll bearings without breaking the bank. NyeCorr® 140, a synthetic lubricant that protects bearings at 480° F, is NSF H-1 food grade registered and contains no PFOAs (Perfluorooctanoic acid). NyeCorr® 140 is the most advanced PFPE lubricant, the most environmentally friendly, and the most economical option available to the corrugating industry today.

6 Benefits of Lubricating Single-Facers with NyeCorr® 140

- 1 Extends operating life of bearings
- 2 Withstands high temperatures and harsh chemicals
- 3 Offers anti-corrosion package for rust protection
- 4 Reduces maintenance costs
- 5 Increases load-carrying capability
- 6 Resists common solvents and long-term contact with steam and water
